

NEW! 10 dB LOUDER!

VENT ALARM SIGNAL

Our new whistle design is based on extensive R&D and Laboratory Testing

Geometry and material selection have been optimized to maximize sound level. Patent application pending.

10 decibels (dB) louder than other designs on the market.

Will sound **TWICE** as loud to the human ear.

Now incorporated into all OEM fill (vent) alarms and combination alarms/gauges.

No changes to the metal castings.
